Don't Get Penalized for Your Own Success...

Doesn't it drive you nuts when you realize the bigger your list is the exponentially more third party services charge you. Even if you don't send out a single email that month, it still costs you EXACTLY the same.

Well, we hate limit's, we hate the restrictions these services place every time we want to import our leads, send our emails and run our business... It's like we have an uninvited business partner.

Well, that's why we built RapidMailer for you. Now, you finally have a choice on how you run your business and you are the one in control of every step.

RapidMailer Has Loads of Powerful Features!

Our powerful dashboard allows you to see at-a-glance how your campaigns are doing. Get full statistics on your opens, clicks, bounces, unsubscribes and everything else you need for maximizing your campaign's success...

Not only that, you can get detailed statistics for each and every email and easily clone a successful campaign with just a click of a mouse...

Easy Third-Party Sender Integration
Save a fortune and ensure your email reaches the inbox by using any of the fantastic third-party senders like Amazon SES, SendGrid, Mandrill, MailJet and more. You can also easily switch with no disruption to service...

This makes Rapid Mailer one the most adaptive mailing system on the market today...

Send EMails for **FREE** or Pay-as-You Go, Your Choice...
Use your own hosts email system for **FREE** or enhance delivery with third party senders that allow you to pay for what you use... Imagine being able to send 10,000 emails for just $1... **Yep, thats HUGE!**

Thank You!
We know that many marketers are on a shoestring budget and we respect that, so we made this system so that you can send email for free using your host's built in email sending service...

However, for enhanced deliverability, we support many systems that allow you to just pay for what you use. Don't get caught in the numbers trap that many autoresponder services force you into. With services like Amazon SES and SendGrid you can just pay-as-you-go and pay a fraction of the price that larger services charge.

Many of these third party services are very cost effective. For example, with Amazon SES you can send 10,000 emails for as little as $1... That's not just cost effective, it's a NO-BRAINER
